

What is... Vehicle Tracking?

These days 'Vehicle Tracking' or 'Telematics' covers a broad spectrum of solutions, and with the increase in GPS enabled mobile phones, PDAs and Blackberrys Vehicle tracking is not now restricted to a box installed in a vehicle but can be an additional service applied to the mobile device of your choice, enabling you to 'sweat your assets' for maximum value.

The key to finding the right solution for you is to understand the key drivers behind your requirement.

- Do you need real time tracking or ad-hoc locations?
- What level of accuracy do you require?
- Is speed and direction important to you?
- What mobile devices do you currently have?
- Is your business planning to deploy PDA's to the drivers?
- Do you have any job scheduling requirements?
- Do you need Lone Worker Protection?
- Do you need Satellite Navigation?
- Is it for management, theft prevention or customer service delivery?

Because TrackaPhone are not restricted to any particular device, or location technology we are able to meet any Vehicle tracking requirement, by selecting the best solution to deliver your key requirements. This means that you can have different solutions for different parts of your business all reporting to a single platform.

Standard Features regardless of your solution choice include:

- Full reporting (HTML/CSV)
- Geofencing
- Snail Trail
- Remote Device Management
- Alarm Management
- Street Level Mapping
- International Mapping
- On Screen Details Display
- Instant Access to 3 Months on screen data.
- Nearest to Location
- Broadcast Messaging
- Lease Options Available
